# CAMEROON

## *Savanna & Forest*

Hunting safaris in Cameroon are conducted in both the Savannah region which is generally in the North of the country and the Forest in the Southern regions. The areas are safe and easily accessible. Cameroon is an incredible country for big game hunting and we arrange safaris in the best hunting areas of the country. Safari Outfitters has represented this superb hunting outfitter longer than any of our other African outfitters with the exception of one. So you will see that we know them very well and are 100% confident in their areas, success, PH's and camps.

# Breaking Records... it's what we do!

## Savannah

Without a doubt, the magnificent Lord Derby or Giant Eland is one the top trophies in all of Africa and the largest of the antelope group. This guy can trot all day and jump a 6 foot fence from a standing start. In addition to Lord Derby Eland, game such as Western Roan, West African Savannah Buffalo, Korrigum, Central Kob, Sing-sing Waterbuck and others may be hunted in the Niwa and Vina hunting areas. Niwa has the largest population of Korrigum (Giant Topi) in all of Africa. The hunting season is from January to mid May with the best time for Eland being January, February, mid-March. The last half of March, April and May are very good months for hunting Eland with the only difference being that it is hotter then and the Eland bulls will have lost much of their black neck hair. Lord Derby Eland success is 100% on very good bulls. Accommodations are comfortable bungalows with en suite facilities. City of arrival is Douala where you will overnight and then on the following day, take a short domestic flight to Garoua and from there travel by vehicle to the hunting area. Typically no overnight is needed on return.

## Forest

Arguably the most strikingly beautiful antelope in all of Africa, the Bongo is high on the list of those who yearn to hunt wild places. Local Pygmies trackers and their small dogs are used to hunt Bongo in the dense rainforest and they do an amazing job. The dogs are used to hold the animal in place while the hunter takes the shot. Without dogs, the Bongo would just keep running and catching up to one and getting off a good shot would be extremely difficult. Nightly rain showers are very important for success as fresh tracks in damp ground are located every morning in the open areas, mineral licks and road crossings. Other game that may be hunted are Sitatunga, Dwarf Forest Buffalo, Forest Elephant, Giant Forest Hog, Bushpig and several species of forest Duiker. If you are lucky you may also see Gorillas. The Likini is camp central and no air charter is required so prices are lower then with most other outfits where clients must charter in. Success for Bongo is very good. Best time for Bongo and Sitatunga are May - July. Dwarf Forest Buffalo February - July. Accommodations are in a very comfortable forest camp with en suite facilities. City of arrival is Yaounde where you will be met by your PH or representative, taken to your hotel for an overnight and then the next day enjoy a beautiful 7 hour drive to the hunting area. No overnight on return.
